

REDUCE, REUSE, RECYCLE

Valley wide Alternatives for Eco-Friendly Redecorating

aka green

Another way to hop on green movement is to use eco-friendly building supplies. AKA Green in Scottsdale is the perfect place to find not only interior finish materials but energy and water conservation devices as well. Here, sustainable, nontoxic, recycled and renewable products are sold, including bamboo flooring, carpet tiles, cork flooring, formaldehyde-free cabinetry and recycled denim insulation. This is also the place to buy beautiful recycled glass tiles, and they even have green interior design and environmental architecture services to help along the way. While most of the products are manufactured, they will soon feature furniture made by a local artist out of recycled materials.
